PERSONAL PROJECTS

- AI Quiz Builder – Real-Time Multiplayer Assessment Platform** Apr 2026 – June 2026
MERN, Socket.IO, Google Gemini AI, JWT, MongoDB Atlas, Vercel, Render
 - Built a real-time multiplayer quiz engine using Socket.IO, supporting 50 concurrent players via in-memory state management and eliminating DB writes during gameplay
 - Engineered an automated tournament scheduler with a WebSocket ticker and fault-tolerant host reconnection (60s recovery window)
 - Integrated Google Gemini AI for adaptive question generation and implemented JWT authentication with secure httpOnly cookies
- ContestPilot – Competitive Programming Automation Agent** May 2026
Python, SQLite, Google Calendar API, OAuth 2.0, Cron/Task Scheduler
 - Developed direct platform scrapers for Codeforces, LeetCode, AtCoder, and CodeChef; synced contests to Google Calendar via OAuth 2.0 with an SQLite deduplication engine
 - Automated background sync for 3x daily runs and built a dashboard tracking streaks and history, saving approximately 5 hrs/week of manual tracking
- BackToOwner – Lost & Found Management System** Feb 2026 – Apr 2026
MongoDB, Express.js, React, Node.js (MERN), NLP
 - Built a full-stack MERN application with a custom NLP-based item-matching engine (Overlap Coefficient) and rule-based filtering for campus lost-and-found management
 - Implemented RBAC authentication, a Cloudinary-based image upload pipeline, and an admin dashboard for claim verification, serving 200+ campus users
